

To be the best we can be.

School vision

UK

Australia is about 32 times bigger than the United Kingdom (UK). In Australia bushfires are normal but this year they have been devastating.

To be the best we can be.

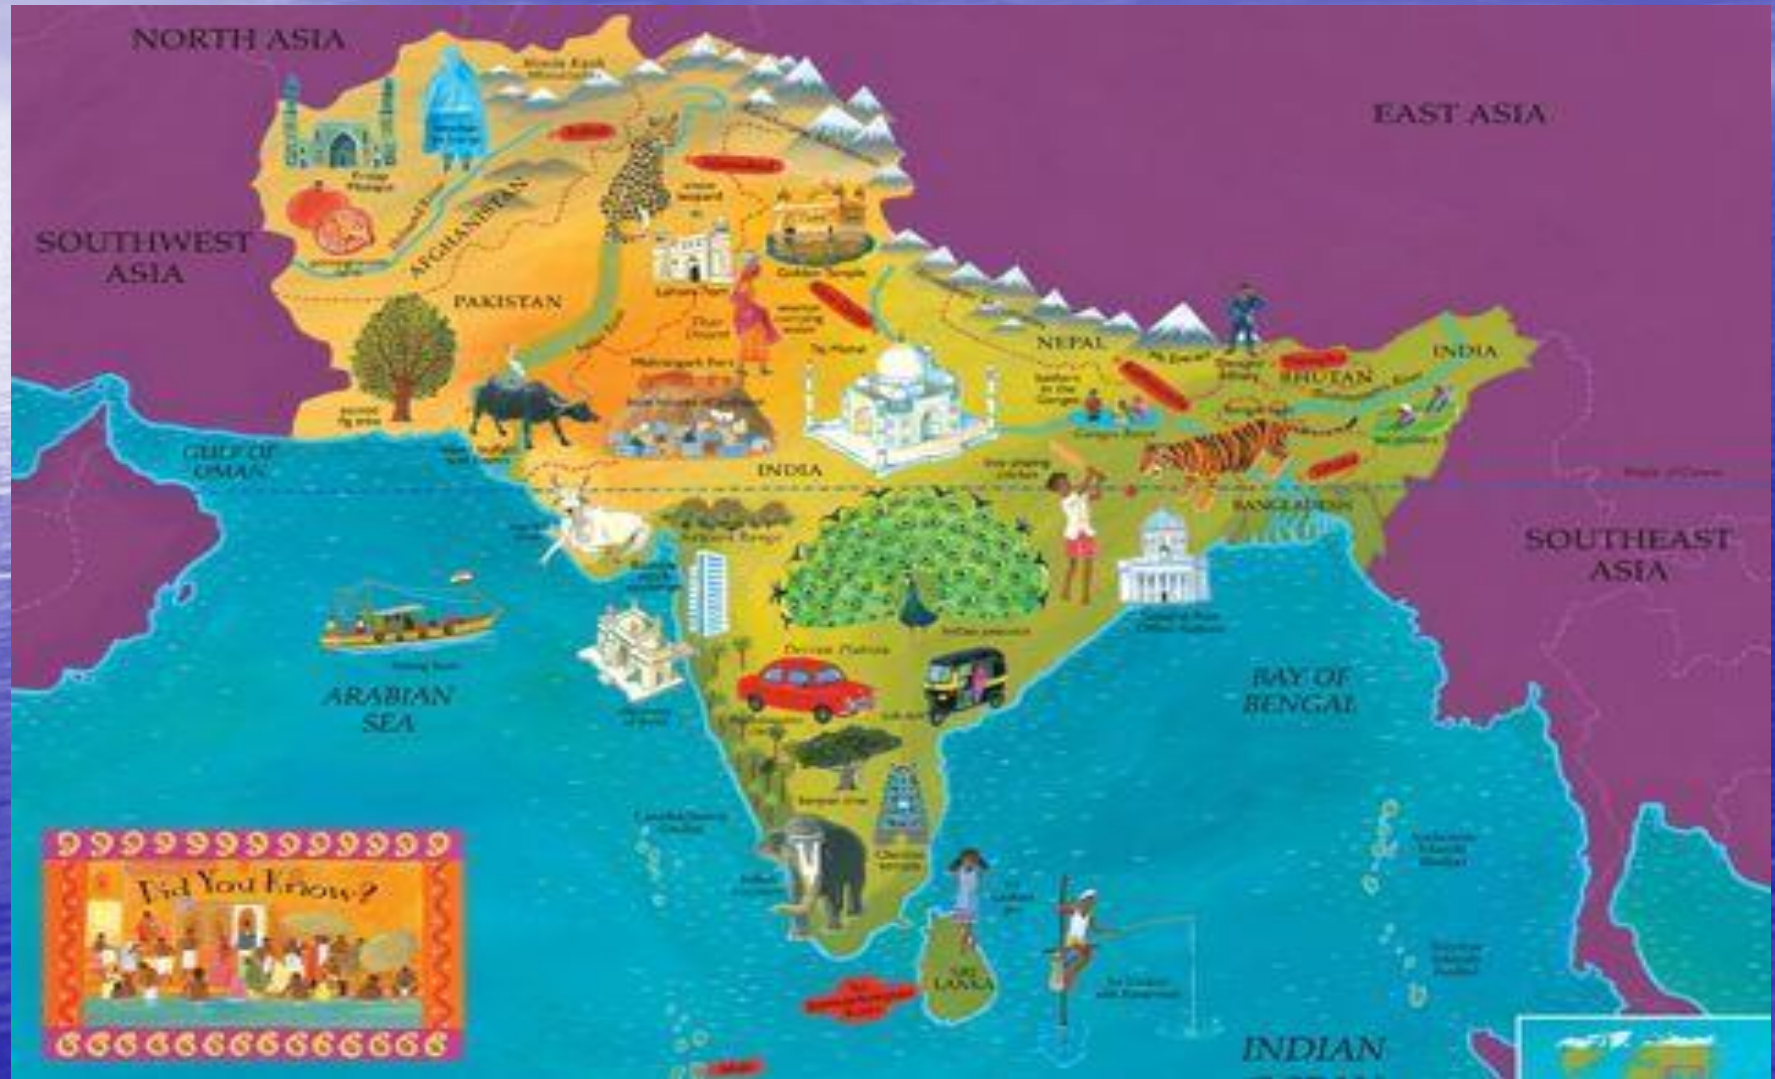

UK

India

India is 13 times bigger than the UK. 64.4 million people live in the UK, 1.2 billion more people live in India!

The Monsoon is one of the most important weather patterns in India. A Monsoon is the wind pattern that causes rain. Monsoons brings huge storms and because there is so much rain that it causes floods. Monsoons in India are normal.

In October 2019, India has had the heaviest monsoon in 25 years! The Monsoon season usually begins in June and starts to finish by early September. But the Monsoon continued into October (2019) which has led to disastrous and even deadly flooding in parts of the country.

Homes have flooded or collapsed.

People have to wade through water to get essentials and most have been stranded inside their homes.

Roads have collapsed...

1,600 people have died due to collapsing buildings and walls.

But...

National disaster relief forces are helping rescue people. Thousands of people have been evacuated.
